

Uploading Files Video

Open Your CloudTV and click on “Gestione Files” in left menu

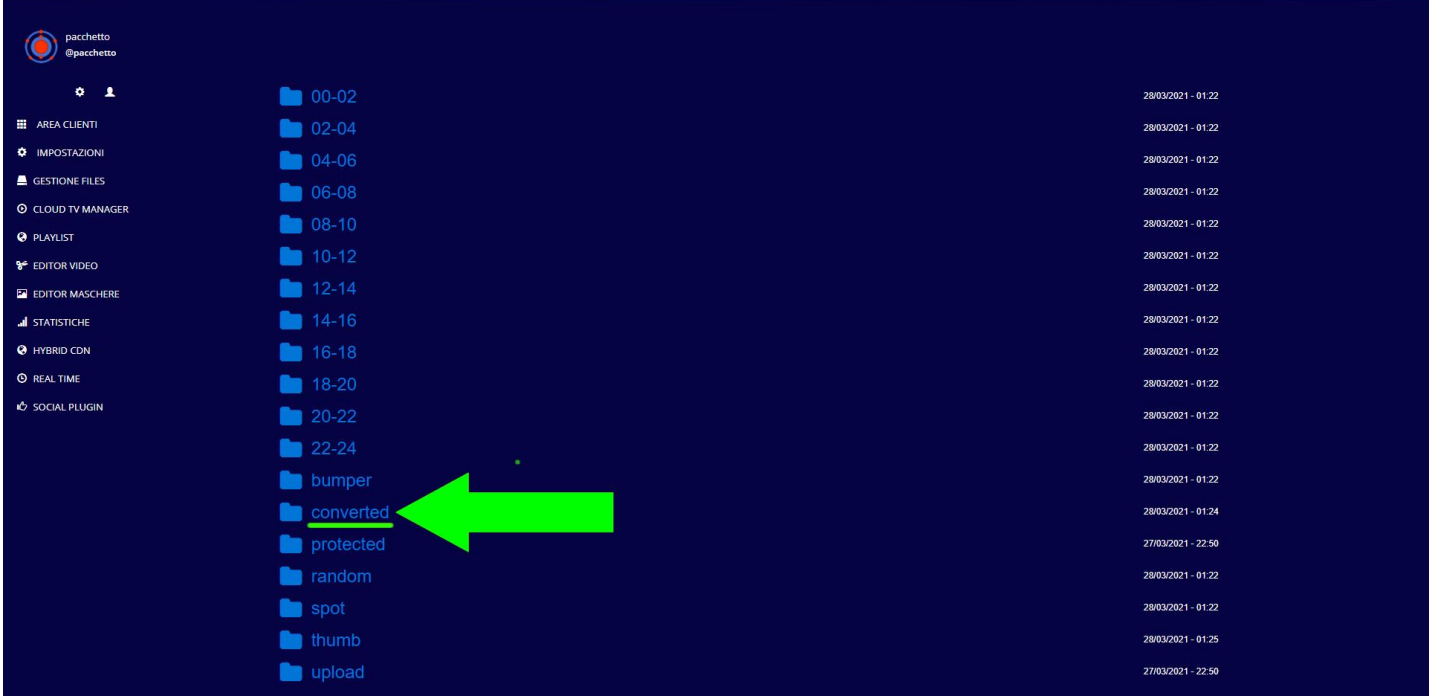

Login with credential received in your Activation Product Email and also Login to FileManager. Default Login: tvstation password: tvstation

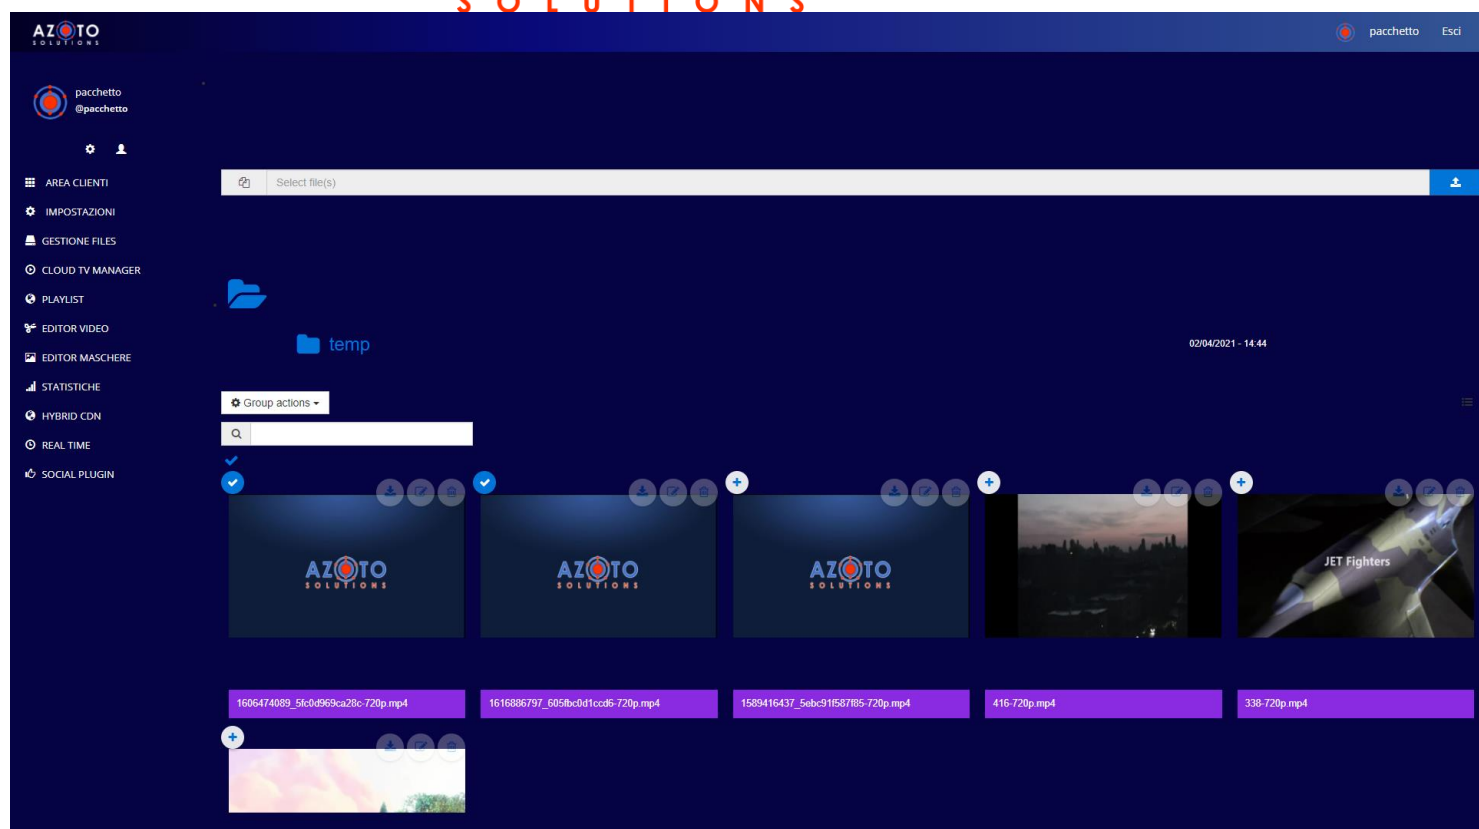

Click on the “Upload Button” and select your videos from your PC.

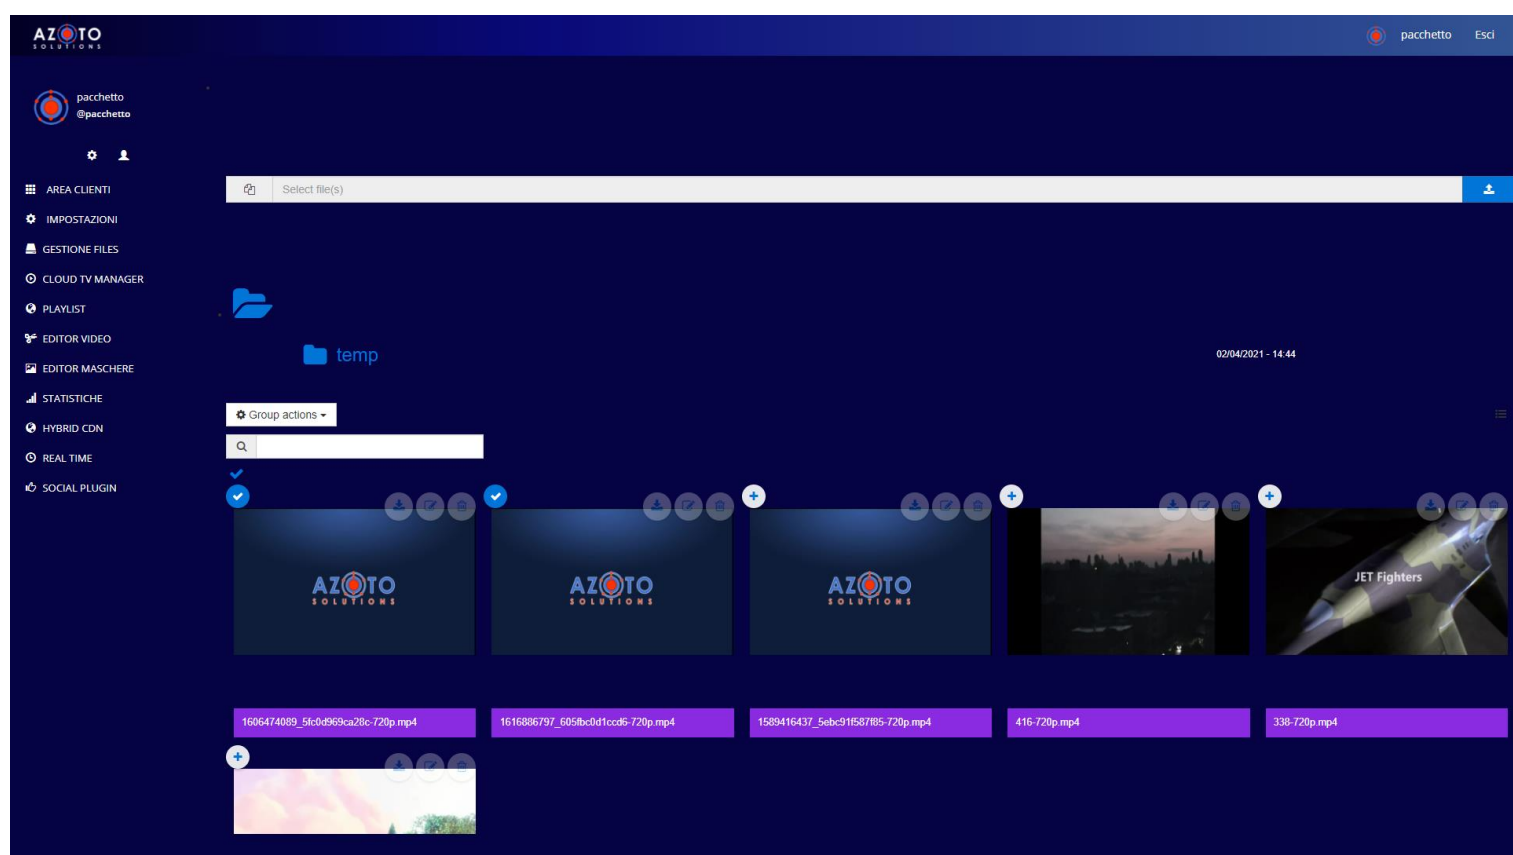

Wait for the conversion process ---- your files will be automatically converted and placed into “converted” folder

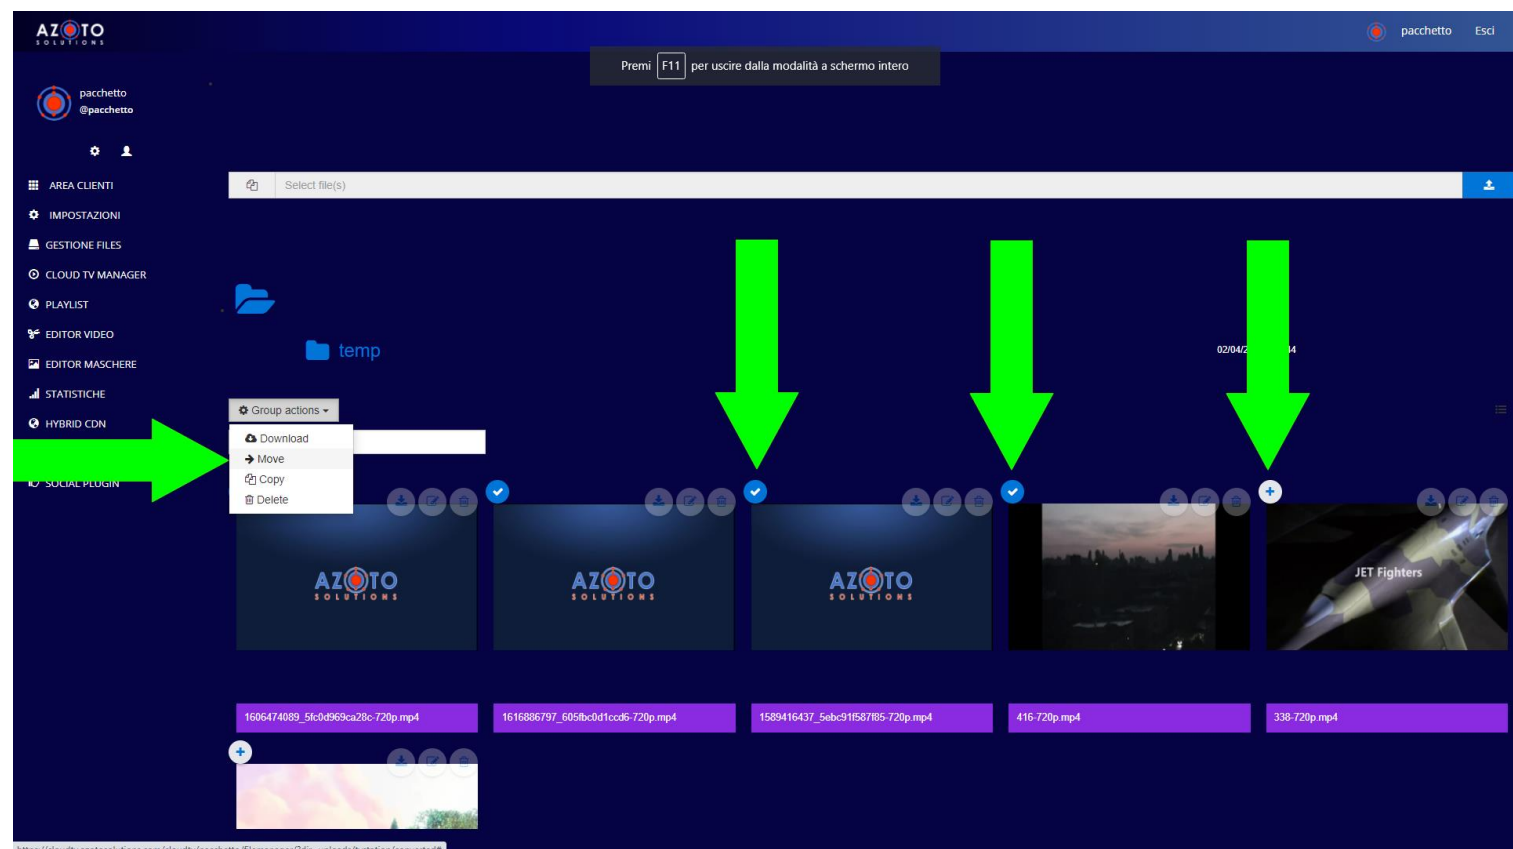

Once the process has finished your files had been converted in the directory “Converted”

Select the desired converted video files by clicking on “+” and move to the desired videos into folders by clicking on “Group Actions” then “Move” then select the final folder according to the playlist you want to create (Random/Spot Folder or 00-02/02-04/04-06 ..ecc)

Refresh the minutes control of the folders clicking on “Aggiorna Conteggi” inside the Cloud TV Manager.

The diagram illustrates the architecture of a video player system. On the left, a video player interface is shown with a play button icon. Below it, the HTML code for the video player is displayed:

```
<div style="position: relative; margin: 0;padding-bottom: 56.25%; padding-top: 35px; height: 0; overflow: hidden;">
<iframe src="https://Video2.azotosolutions.com/cloudtv/demo/player" width="100%" height="100%"
frameborder="0" scrolling="auto" allowfullscreen style="position:absolute; margin:0; padding:0; top:0; left: 0;width:
100%; height: 100%;"></iframe> </div>
```

 A button labeled "COPIA CODICE PLAYER" is located below the code. On the right, the "CONTROLLO SERVER" (Control Server) is shown. It consists of two columns of components. The left column contains: "INFO", "WEB ENCODER", "INFO", "RELOAD PROGRAMMAZIONE", "INFO", "CONVERTI VIDEO IN SHD 1080P", "INFO", "PROTEGGI VIDEO", "INFO", and "PLAYER CON LOGO". The right column contains: "INFO", "RIAVVIA SERVER", "INFO", "AGGIORNA CONTEGGI", "INFO", "CONVERTI VIDEO IN HD 720P", "INFO", "PLAYER NO-LOGO". A large green arrow points from the "RELOAD PROGRAMMAZIONE" component to the "AGGIORNA CONTEGGI" component, indicating a data flow or control signal.

Random Minutes MUST be at least 24 Hours (1440 minutes on videos in the Random Folder”

Spot must be also present in the “Spot” Folder. You can upload 1 or multiple spot videos.

The system will create a random playlist with 1 Video and 1 Spot randomly choosed from the spot folder.

The diagram compares two control methods: SPOT and RANDOM. A large green arrow points from the SPOT section to the RANDOM section.

CONTROLLO SPOT

- SPOT: 1 SPOT Caricati
- SPOT: 34 Secondi/SPOT
- SPOT: 0.5666666666666667 Minuti/SPOT

CONTROLLO RANDOM

- RANDOM: 1 Random Caricati
- RANDOM: 10/1440 Minuti
- RANDOM: 634 Secondi/Video
- RANDOM: 10 Minuti/Video

Create Random Playlist

Once the folder Random and Spot are configured, scroll down and create your Random Playlist by clicking on “Crea Playlist Random 1 Video – 1 SPOT”.

CREAZIONE PLAYLISTS

Create 2Hours Playlist 2VIDEO – 1 SPOT

Once the 2 Hours folders and Spot are configured, scroll down and create your Playlist by clicking on “Crea Playlist Giornaliera 2 Video – 1 SPOT” for the daily playlist or “Crea Playlist Settimanale 2 Video – 1Spot” for the weekly playlist.

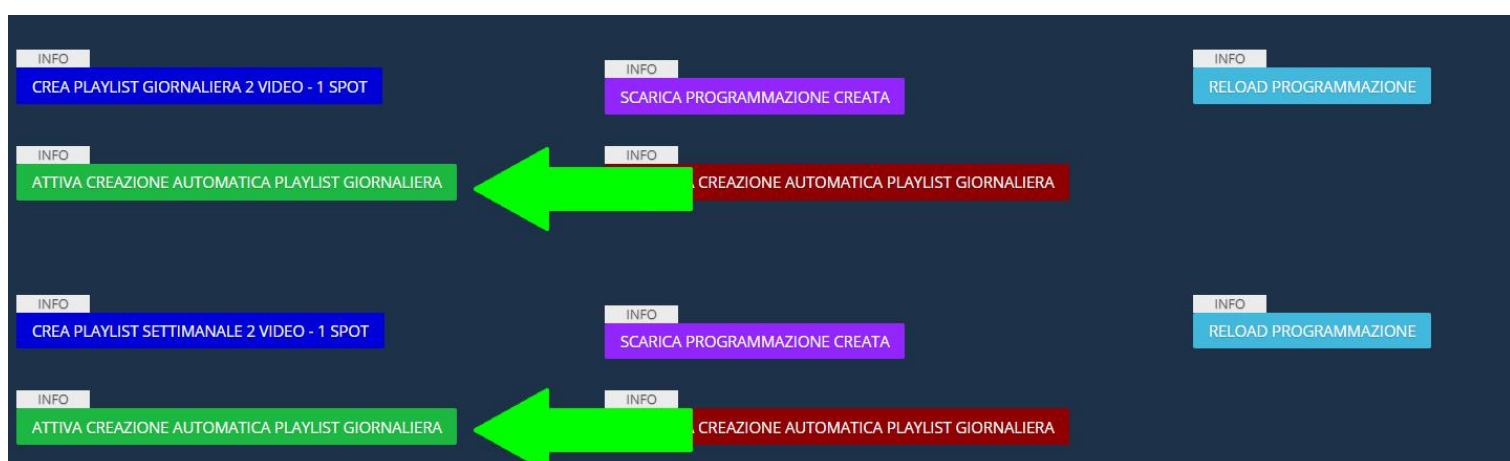

Click on “Reload Programmazione” in order to apply your new playlist in real-time.

Click on “Attiva Creazione Automatica Playlist Giornaliera” in order to automatically re-create your random playlist 2 video 1 spot daily, shuffling all the files automatically to recreate a different playlist everyday.

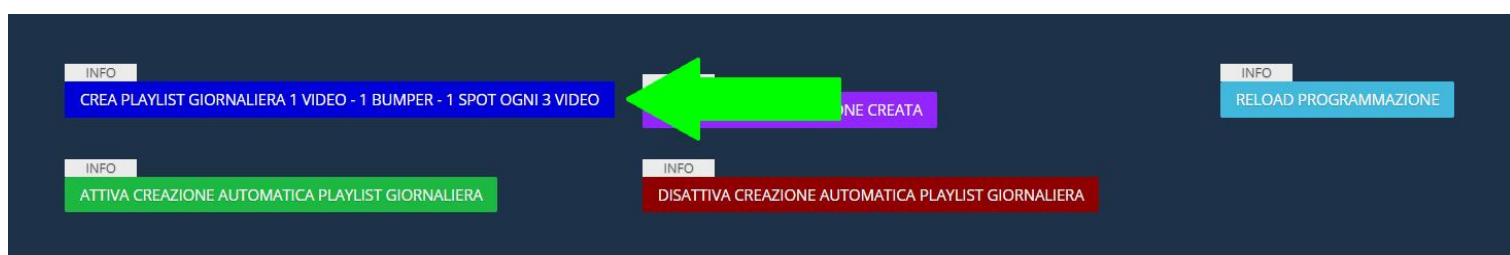

Click on “Attiva Creazione Settimanale Playlist Giornaliera” in order to automatically re-create your random playlist 2 video 1 spot weekly, shuffling all the files automatically to recreate a different playlist every week.

Create 2Hours Playlist 1VIDEO – 1 BUMER -1 VIDEO – 1BUMPER – 1VIDEO – 1SPOT

Cut (“Taglia”) or Copy (“Copia”) your videos inside the “protected” folder into the folders 00-02 , 02-04, 04-06 , 06-08, 08-10, 10-12, 12-14 , 16-18, 18-20, 20-22, 22-24 and into SPOT and BUMPER Folders.

Once the 2 Hours folders and Spot and Bumper are configured, scroll down and create your Playlist by clicking on “Crea Playlist Giornaliera 1 VIDEO-1BUMPER – 1 SPOT OGNI 3 VIDEO” for the daily playlist.

Click on “Reload Programmazione” in order to apply your new playlist in real-time.

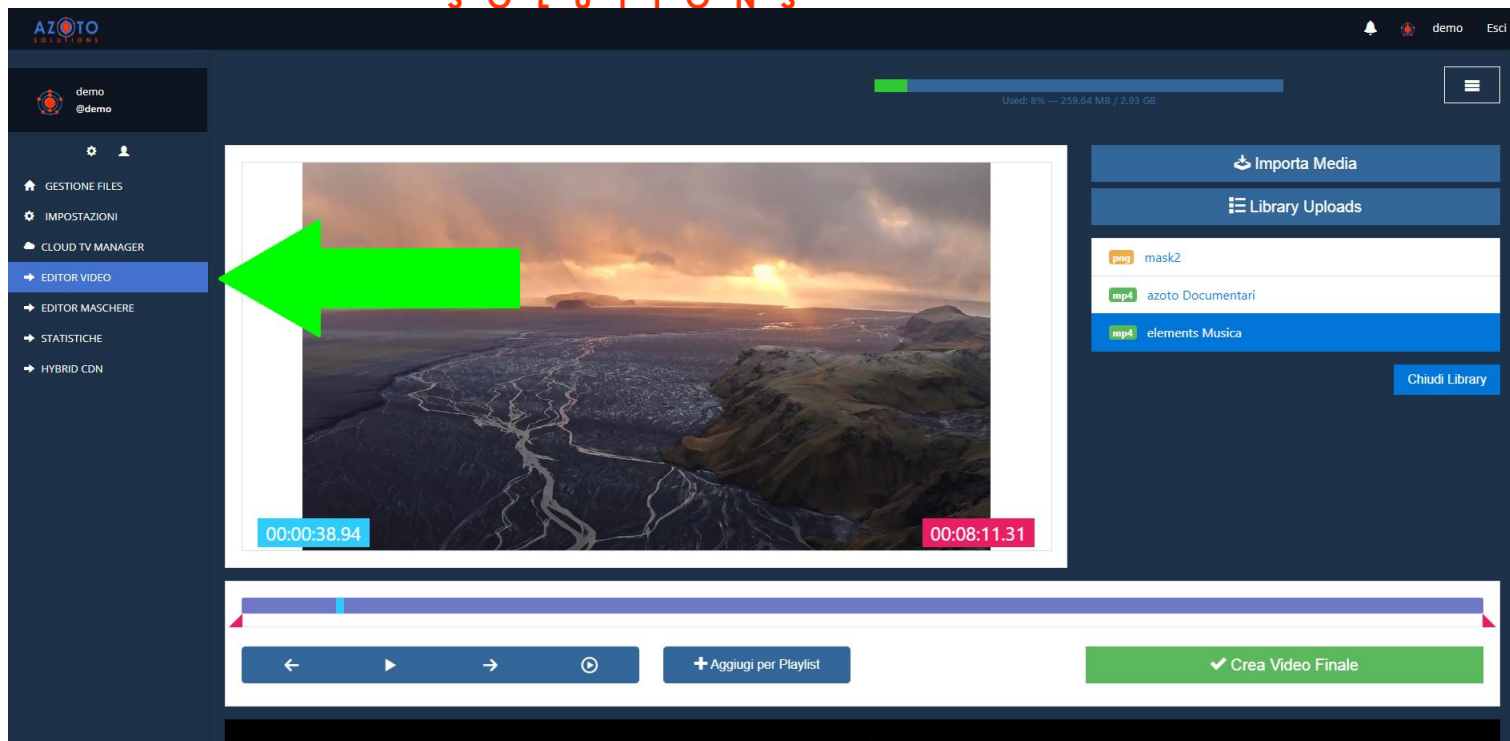

Click on “Attiva Creazione Automatica Playlist Giornaliera” in order to automatically re-create your random playlist 1 video 1 spot daily, shuffling all the files automatically to recreate a different playlist everyday.

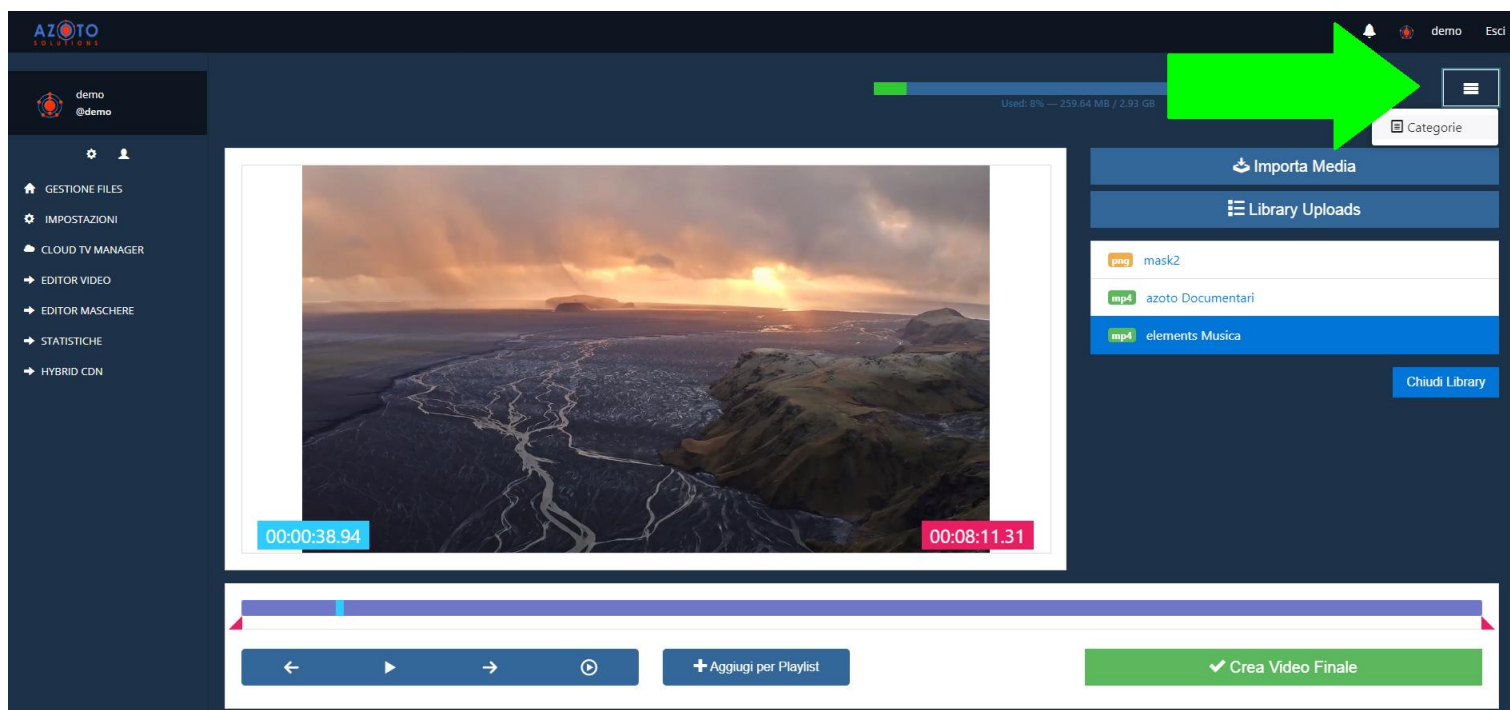

VIDEO EDITOR – HOW TO USE - TUTORIAL

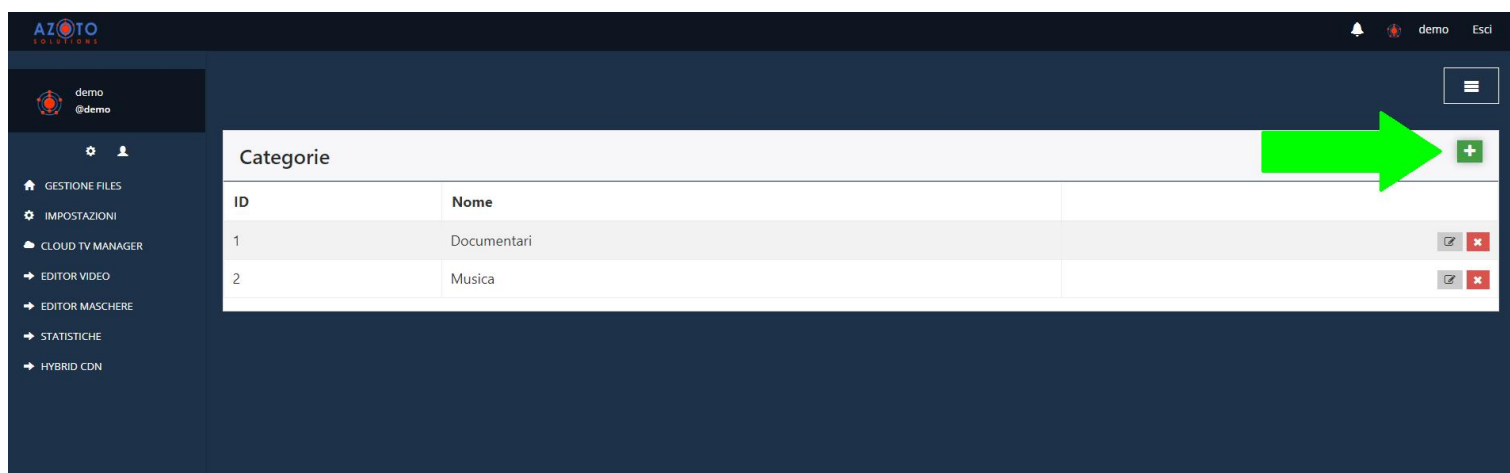

Open the “Editor Video” from left main menu.

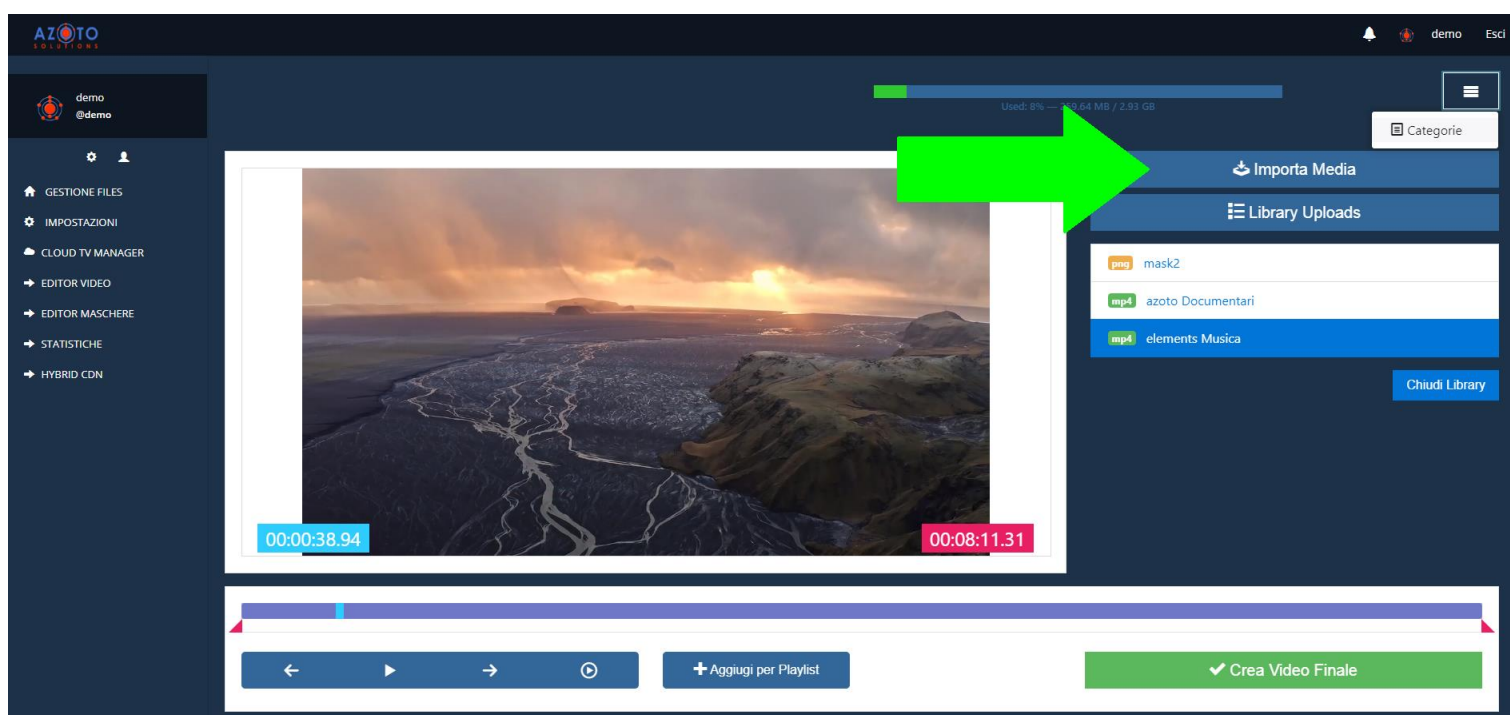

Create Your Videos Category by clicking in the menu in the right top corner. Click on “Categorie”

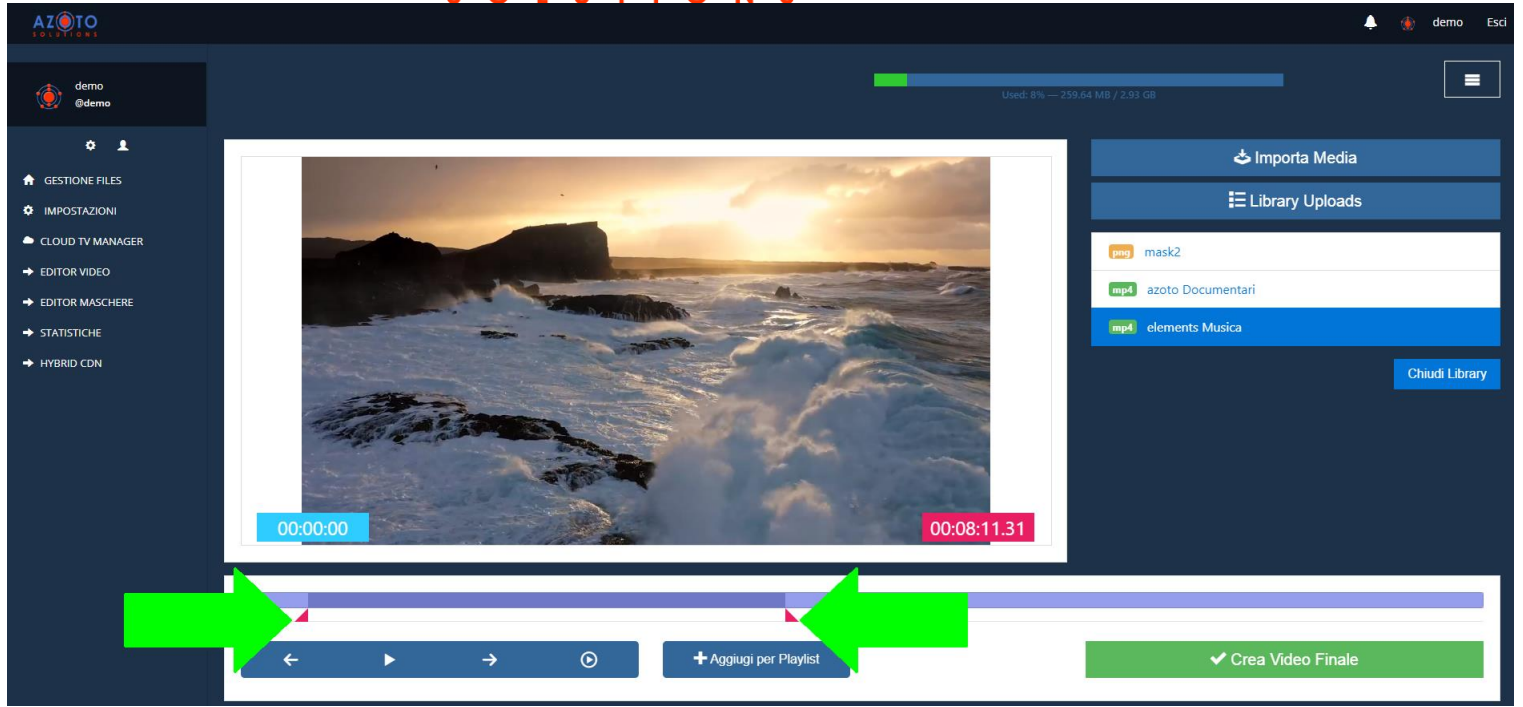

Click on + to add all your categories for your videos. DO NOT USE SPACE OR SPECIAL CHARACTERS.

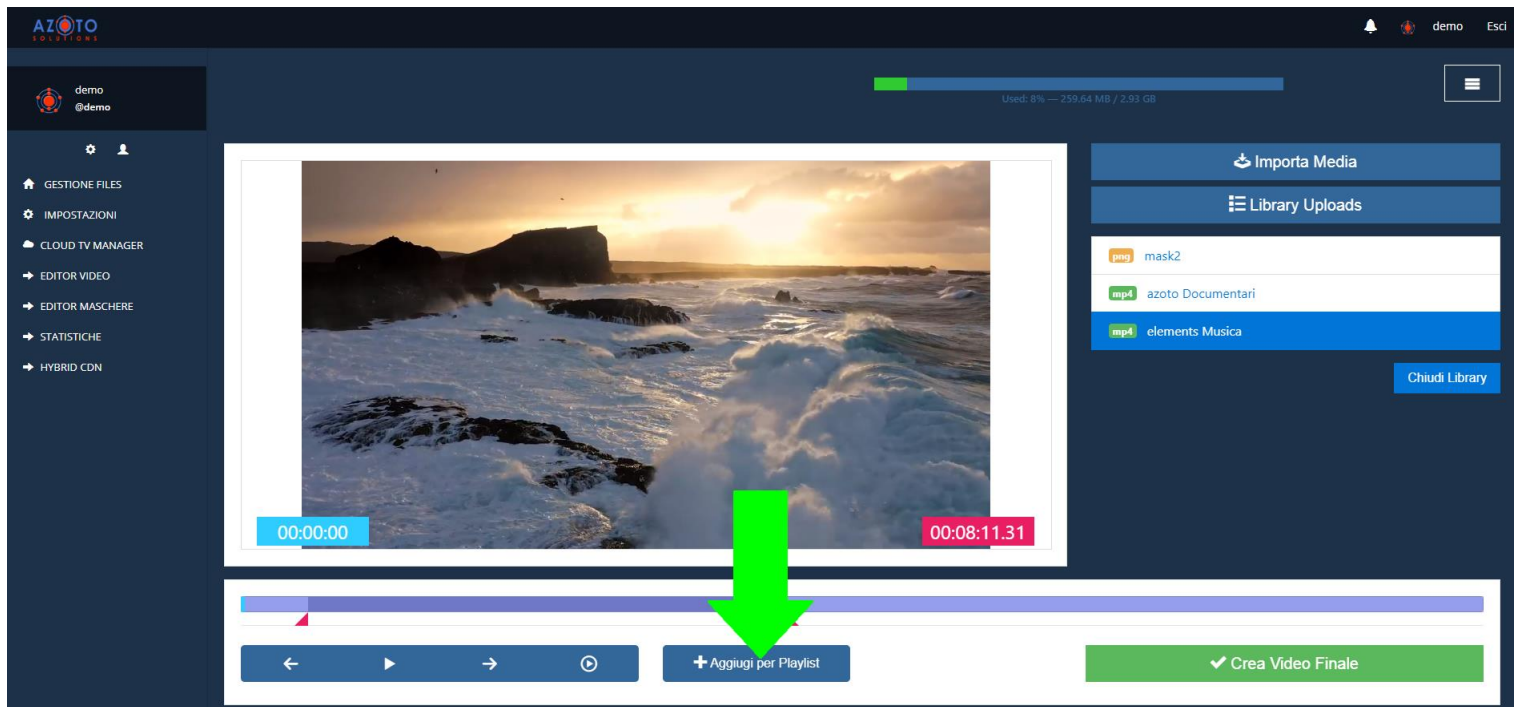

Back to home and select “Importa Media” in order to upload your video file sto be edited.

Once uploaded you can select your videos from the right menu “Library Uploads” and selecting the part of interest of your video using the purple triangles bottom in the video section.

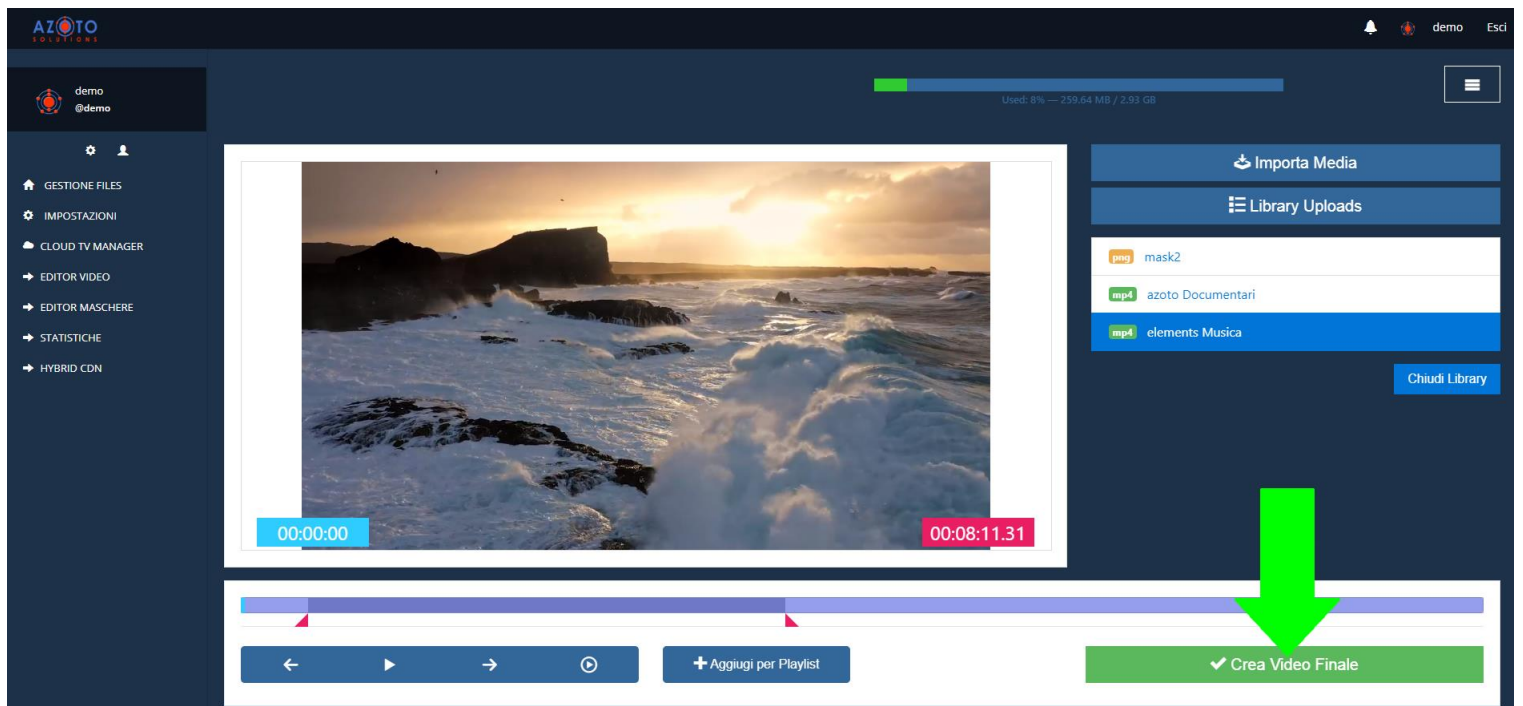

Finally Click to “Aggiungi Per Playlist”

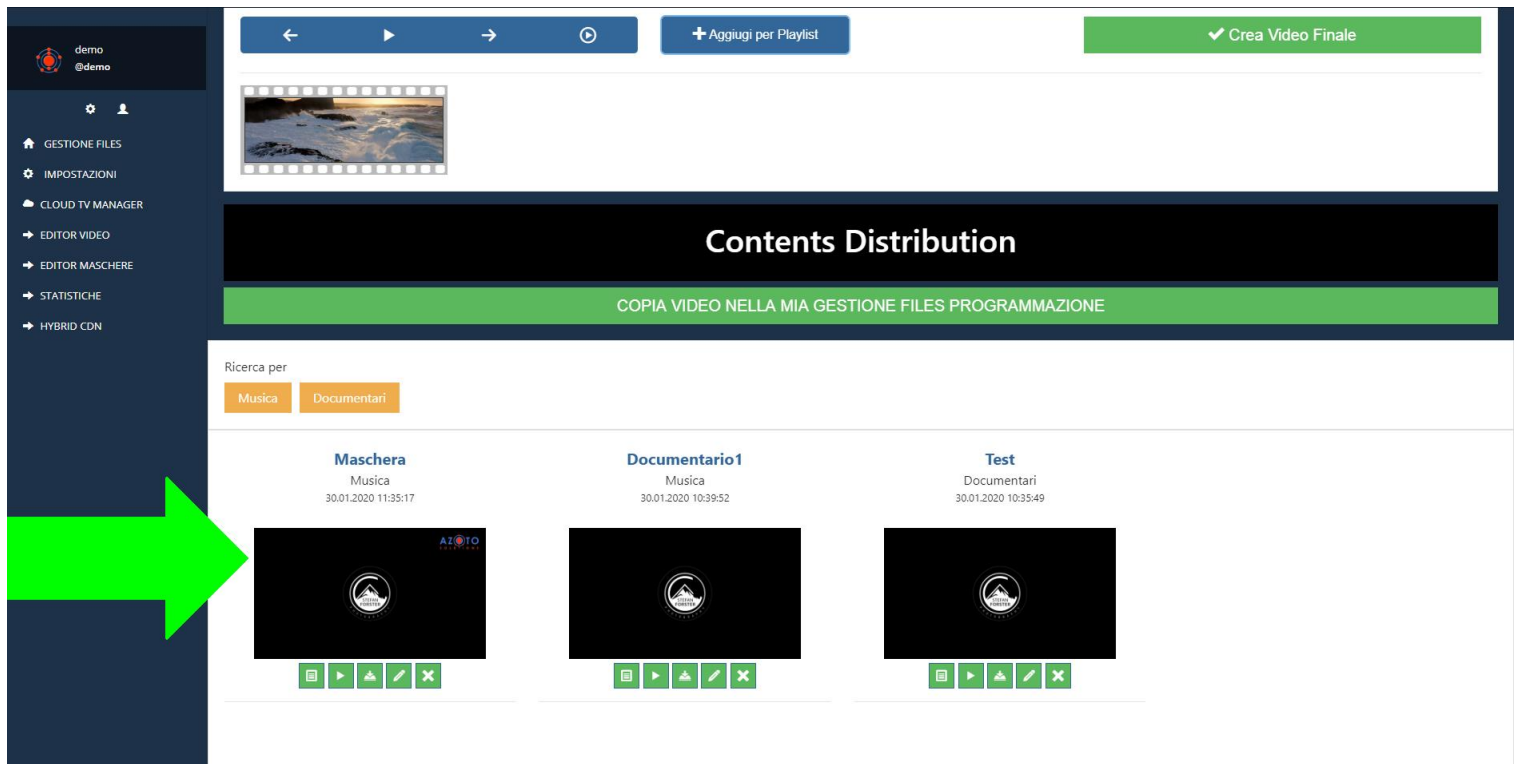

Now you can add another part of a different video with the same procedure as the first video or creating your final video by clicking on “Crea Video Finale”

If you don’t need to cut your video simply click on “Crea Video Finale” without touching the purple triangles.

Your video will be cutted as desired , you’ll find the final edited video in the bottom section.

You can get the embed code of every single video in order to add the video to your website simply copying the code inside the html part of your website.

You can also copy all the output edited video inside your main folder for the playlist by clicking on “Copia Video Nella Mia Gestione Files Programmazione”

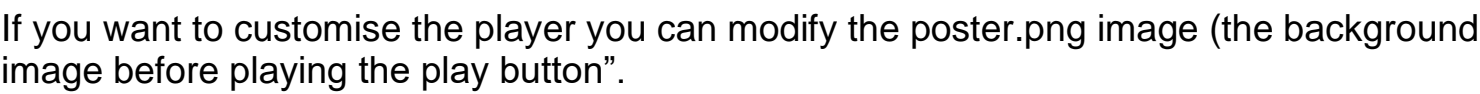

You'll find a copy of all your edited videos inside the main folder inside “Gestione Files”.

You can now move your edited files inside the folders 00-02 , spot or random folders in order to create your playlists.

HOW TO GET MY PLAYER EMBED CODE

Simply click on “Copia Codice Player” in order to get the embed code of your player and

Simply upload your poster.png file by clicking on “CLICCA QUI PER CARICARE I TUOI LOGHI PERSONALIZZATI”

Choose your poster.png image from your disk . Image size: 1280*720 format:png
Name: poster.png

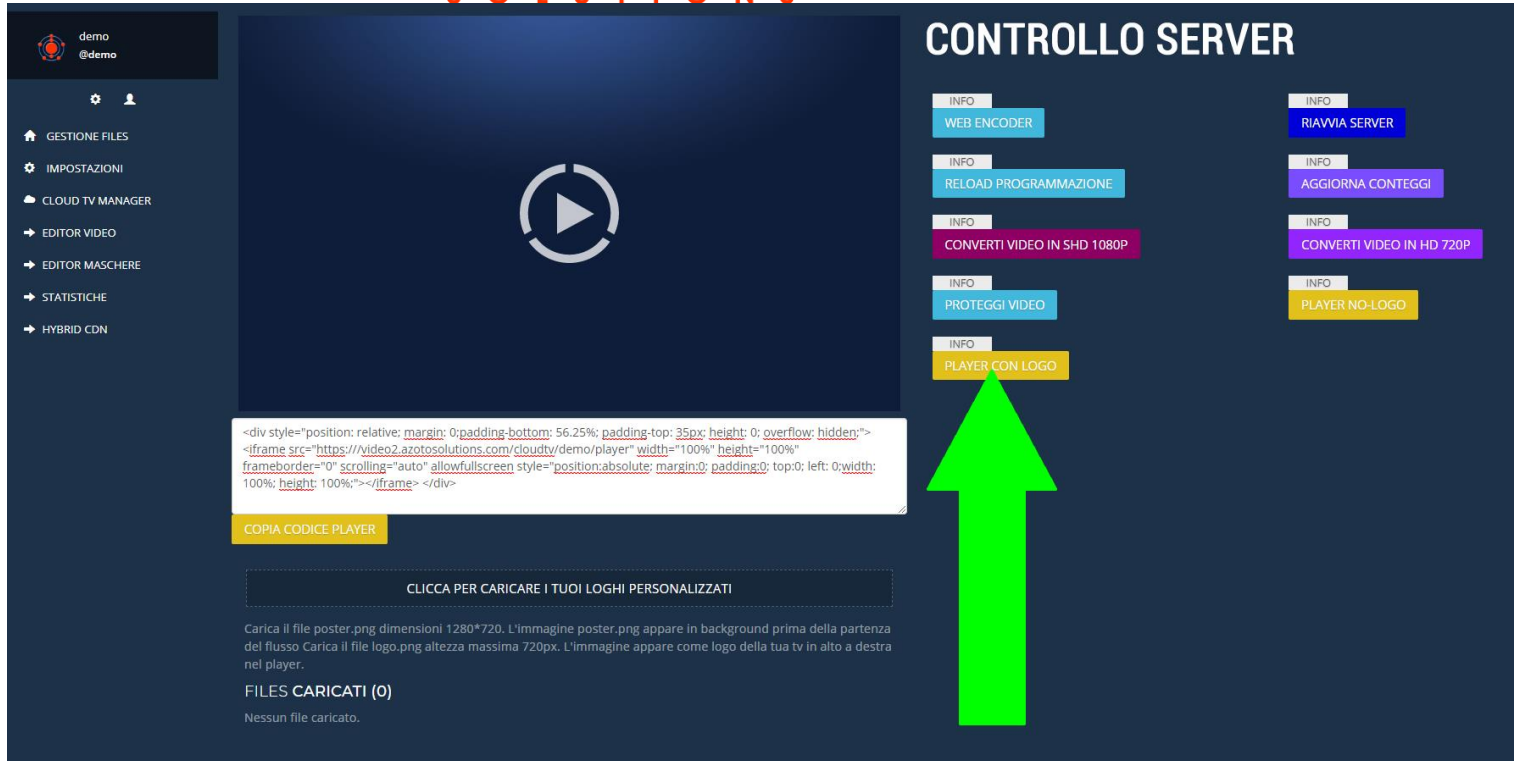

If you have made your palylists without protecting your videos with the mask you should also upload a logo.png inside the player by clicking on “CLICCA QUI PER CARICARE I TUOI LOGHI PERSONALIZZATI”

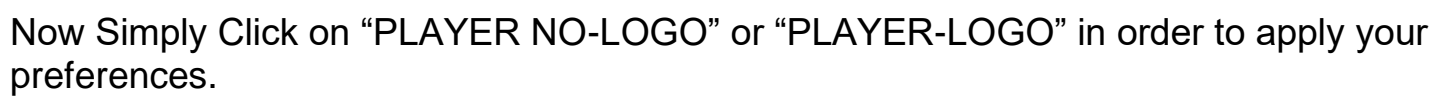

Choose your logo.png image from your disk . Image size: 300*200 format:png

Name: logo.png – testing the best sizes that suits your need inside the player

Then click on “PLAYER CON LOGO” to apply the changes.

Upload again both files poster.png and logo.png like this.
